EXPERIENCE OVERVIEW

As a results-driven digital marketer with a degree in Information Systems, I owned the daily operating rhythm of the digital marketing function and built the systems the team runs on.

I successfully handled social media strategy, content strategy, content management, community management, SEO & AI SEO and paid-social supervision that drives leads generation and conversions for Planville GmbH, a fast-growing German B2C green energy service company.

Over 15 months, I led a complete content strategy overhaul and rebranding across five platforms, turning scattered activity into a repeatable operating cadence built on regulatory newsjacking content tied to live German solar and energy policy shifts.

With my varied expertise in digital, creative and leadership, I integrated strategic leadership, frameworks, task management with pioneering AI-integrated workflows in my team to push for better team coordination, performance and efficiency.

SCOPE OF WORK & KEY ACHIEVEMENTS

Marketing Coordinator & Assistant to Head of Marketing

Operating as the strategic and operational bridge between Planville's Head of Marketing and the wider team. Managing daily marketing operations, coordinating initiatives across owned, paid, and earned channels, and reporting directly to senior leadership. Built a team's system and workflow that can drive better brand, performance and growth marketing. Conducting marketing initiative research, competitor analysis, and cross-functional coordination with HR on marketing applicant screening and employer branding. Led a full marketing tech stack audit, identifying redundant tools and building the business case for AI tools like Claude AI or better SaaS platforms as a cost-effective replacement across multiple marketing functions.

Social Media Strategist, Content Manager, Community Manager and SEO/AI SEO Support

Integrated corporate branding and corporate communication of Planville into its social media. Took full authority of Planville's entire social media ecosystem from creative direction to daily execution during a pivotal brand transformation. Rebuilt the content strategy from the ground up across five platforms (Instagram, Facebook, TikTok, YouTube Shorts, LinkedIn), aligning it with business growth objectives to drive lead generation and conversions. Managed and coordinated the marketing content and assets as content manager, from planning, production, and posting to saving as organized company digital assets. Maintain reputation management as the community manager on Google Reviews and Trustpilot. As SEO Support, I led to scale up SEO performance in AI SEO (GEO/AEO) through strategic content and technical initiatives together with the SEO Officer/Web Developer.

💡 Regulatory Newsjacking

Built content format around relevant Germany's dynamic solar energy knowledge and energy politics. Successfully achieved virality (100K+ views on both Instagram and TikTok) and then we were able to turn ideas and momentum to generate good leads.

👍 Reputation Engine

Handled and actively maintained company reputation on Google Reviews (2000+, 4.9 5 Stars) and Trustpilot (4.9 Rating) with 100% response coverage. Contributed to +682% Profile Views on the company's Google Business Profile in 15 months.

🔧 Internal AI-Built Operating System

Shipped an AI automatic curated news engine, an AI form funnel, an AI integrated leads dashboard, an AI integrated content portal, an AI META Ads dashboard and more.

✨ Rebranding at Scale

Led a complete visual and strategic rebranding across 5 social media platforms in 15 months. Gathered 11.18M impressions, 26.15K interactions, 1506 posts, all organic.

🌐 AI SEO Priority Initiatives

Reached 38 Google AI Overview citations, high citation on AI LLMs (ChatGpt, Claude and Gemini) and maintained to be listed first for a key regional query on Google Search. Visibility most marketers can't easily demonstrate.

💎 Efficient Paid Social Supervision (META Ads)

Supervised a program of effective and winning creative, both static and video, to low € Cost Per Lead (CPL), which through structured analysis and testing.

TEAM MANAGEMENT

(As Marketing Coordinator)

I developed the relevant marketing team's SOPs and maintained an Asana-based task and workflow system to **maintain and drive team performance, covering the full marketing function across seven project areas: Social Media, Graphic, Video, Data Analytics, Performance Marketing, Website/SEO, and Offline Marketing.**

I observed and structured recurring daily and weekly routines with **analysis of the workloads, priority tagging and due dates, turning scattered activity into a repeatable operating cadence for all seven specialties.** I also researched and implemented new marketing initiatives like exploring new tools, new features and new technologies that can be used in our channels.

I ran a **daily coordinator workload report and a weekly team coordination meeting to keep the creative and performance teams aligned and on schedule.** Lastly, I shared it and asked for feedback from the head of marketing about current team performance and workloads.

This system connected every other area of my work, SEO support, review management, content, and reporting became tracked daily duties rather than one-off tasks.

AI BASED MARKETING

(As Marketing Coordinator)

I built some internal marketing tools using AI-assisted development (Claude Code, vibe coding). **These tools were aimed to be helpful for our workflows and analytics, be used freely by the team, and may replace some of our subscribed SaaS tools.**

These tools streamlined the team's content, recruiting, and lead workflows:

1. **An automated curated-news engine** pulling live industry articles with sentiment scoring, relevance ranking, and AI-generated content ideas, feeding the newsjacking content strategy directly.
2. **A content portal and editorial calendar** synced to the content plan with automatic updates and other creative analytic features inside the tool.
3. **A lead-capture funnel feeding a real-time leads dashboard and lightweight CRM**, with activity log, filtering, status tracking, and CSV export.
4. **Meta Ads-monitoring dashboards** aggregating spend, applicants (recruiting), and cost-per-result across recruiting and performance accounts.

Together these tools formed the operating system for the content strategy: the news engine surfaced ideas, the calendar scheduled them, and the dashboards measured the results.

META ADS MANAGEMENT

(As Marketing Coordinator)

I supervised two parallel META Ads operations, customer lead generation and tradesperson recruitment, owning strategy, budget allocation, and performance review rather than hands-on campaign build.

- Two META Ads operations (customer lead generation and tradesperson recruitment), directing ~€18,000 and ~€5000 in monthly spend with ~426,000 and ~4700 impressions.
- Oversaw a lead-gen program producing ~165 monthly website leads; improved the flagship campaign to 138 leads at €108.57 each while cutting cost per lead versus the prior month.
- Directed recruitment campaigns acquiring qualified tradesperson applicants from €9 each, including international (Romanian/Moldovan) sourcing.

Across both accounts I supervised roughly €23,500 in monthly ad spend reaching about 430,000 people, and directed a 300+ campaign test-and-scale library where budget stayed concentrated in a small set of proven winners while underperformers were paused.

Because solar installations carry a high customer lifetime value, a CPL in the €100–€130 range is typically viable, provided sales team converts a healthy percentage of those leads into consultations.

Paid-social lead generation — strategy & performance, 3 campaigns / 30 days

165

Website Leads generated.

€108.57

Average cost per lead (CPL)

€17,914

Total managed ad spend

Structured creative testing for optimized results and efficiency.

- Supervised strategy and performance rather than hands-on execution. Directing the framework, reading the signal, and moving budget to what worked.
- Directed a testing framework across multiple video and static creative variants and shifted budget toward top performers.
- Winning creative delivered lower cost per lead, well below program average.
- Coordinated monitoring across recruiting and performance campaigns from a single view.

CONTENT STRATEGY & BRANDING

(As Social Media Strategist)

Before I joined (Pre-May 2025)

Before: Inconsistent visuals, raw photos, mixed content types, no clear target audience, no clear KPIs, no branded templates and too focused on memes.

After Content Strategy Overhaul & Rebranding (After May 2025 - Present)

After: Consistent content strategy and branding. Better corporate and brand communication. All contents marketed and aimed at the relevancy and authority of Planville as a top company in the industry to drive high-quality engagement, lead generation, targeting the right target audience and not only traffic or metrics.

BEFORE

Pre-May 2025

- ✗ No consistent visual direction, identity or branding
- ✗ Raw installation photos, random job postings
- ✗ No content strategy, ad-hoc posting, wishing for viral numbers only
- ✗ No production workflow or standards
- ✗ Primarily Instagram, inconsistent cross-platform
- ✗ Low, sporadic engagement

AFTER

May 2025 – Jul 2026

- ✓ Unified branding and visual identity across channels
- ✓ Regulatory newsjacking tied to live policy shifts
- ✓ Better content pillar, educational + trending content strategy
- ✓ Asana workflow, content plan & community management
- ✓ One for five-platform production: IG, FB, TikTok, YouTube, LinkedIn
- ✓ KPIs aligned to lead generation, not vanity traffic

Content overhaul and rebranding focused on: modern corporate identity, educational authority content, face-to-camera trust-building, and sustainable production workflows.

SOCIAL MEDIA OVERALL GROWTH

(As Social Media Strategist)

Building and developing social media to be a company's marketing engine while aiming to be relevant in the social media landscape, especially for a growing, niche service company brand like Planville was not an easy task. If we only chase viral numbers but our content is not planned well and offers no value, then in the end we only build an irrelevant target audience, lose potential leads and lose our credibility in the long run. In 15 months, I managed a five-platform social operation across Instagram, TikTok, YouTube, Facebook, and LinkedIn that reached 11.18M impressions and 26.15K interactions across 1,506 posts over the full tenure. I drove a July 2026 peak of 2.97M impressions in a single month.

The core of my strategy was regulatory newsjacking. We built a sustainable content strategy around relevant German solar and energy policy shifts like the 2027 feed-in tariff change, KfW funding cuts, regional mandatory solar panels policy and more. This approach produced the top-performing content on every platform.

Key KPI performance was collected and analyzed every 3 months. From there, I created and then presented the social media evaluation and report it to the head of marketing to make the next steps.

LATEST PLATFORMS ANALYSIS

(As Social Media Strategist)

Platform results: **TikTok became the strongest organic channel. I achieved a viral post with 86K views (ongoing), 480 shares, 304 saves, and 26 new followers from a single video, distributed 99.4% organically through the “For You” feed.** I doubled average reach per post in July, from 4,560 to 9,350, while publishing fewer posts, an efficiency gain driven by content quality rather than volume.

On Instagram, I grew followers by 201 (+19.11%) in 90 days through content optimization. **Average views of our Reels were 800~1000+ views and our viral reels achieved from 10K to 130K+ views. Reels drove roughly 78% of all interactions from only 16 reels, and content reached 77 to 96% non-follower audiences, extending the brand well beyond its existing base.** Roughly two-thirds of engagement came organically.

On LinkedIn, I reached a 20.08% engagement rate, the highest of any platform, at an average of 50 clicks per post and 797 total clicks, showing the account converted a professional B2B audience efficiently despite a smaller reach.

CROSS PLATFORM PERFORMANCE

(As Social Media Strategist)

Performance by Platform (trailing 90 days, May to July 2026)

Platform	Reach / Views	Followers	Engagement	Top Signal
TikTok	9,350 avg reach / post	+26 from 1 viral post	99.4% FYP	Viral: 86K views · 480 shares
Instagram	77–96% non-follower	+201 (+19.11%)	~ ⅔ organic	Reels = 78% of interactions
LinkedIn	50 clicks / post avg	B2B professional	20.08%	797 total clicks
YouTube	Shorts-led with the best algorithm	Growing	1% Engagement Rate	Policy explainers
Facebook	Cross-posted reach	Stable	Steady	Newsjacking top posts

ESTABLISHED SOCMED SYSTEM

(As Social Media Strategist & Content Manager)

I owned Planville's social media end-to-end and managed all content, coordinating all creatives in my team. I plan and script the content, publish it across every channel, keep the assets and calendar organized, and report on performance, all guided by the production and brand rules I maintain.

I created a system and workflow for the team to function well, to sustain performance and make correct short- or long-term improvement decisions.

1. **Planning and research.** Concept and script campaigns tied to real events (e.g. the heat-pump funding-cut "Förder-Garantie" push) and research search visibility via Google Search Console.
2. **Content planner.** Run the monthly Redaktionsplan in Sheets, mapping each post to format, platform, category, assets, and status.
3. **Scheduling and publishing.** Queue and time posts across IG, TikTok, YouTube, LinkedIn, and Facebook from Metricool and Meta Business Suite.
4. **Content library.** Organize the raw footage and asset archive in Google Drive by shoot, campaign, and subject.
5. **Quarterly reporting.** Write the Social Media Auswertung every 3 months, breaking down each channel with an overview and next steps.
6. **Production guidelines.** Maintain the Produktionsnotizen covering roles, workflow, content pillars, and equipment.
7. **Brand book(Social Media).** Keep the social brand book defining visual style, tone, and typography for video content.

OPTIMIZED SEO PERFORMANCE

(As SEO & AI SEO (GEO/AEO) Support)

I contributed to organic search growth that reached 98 organic keywords (+42 in three months), 25 keywords ranking in the top three (+21), and around 1.5K monthly organic traffic, with non-branded traffic up 209, showing growth beyond people already searching the company name.

I drove a regional landing-page strategy that ranked the Erkelenz page organically for high-intent local queries and anchored a 17-city regional cluster within a 50km service radius. My SEO content-based strategy, through better blog structure and landing page optimization, made us capable of competing with the top competitors who are dominating the market.

We achieved strong visibility in AI-driven search (GEO and AEO), an area most marketers cannot yet demonstrate. The brand reached 38 Google AI Overview citations (+30 in three months) plus appearances in ChatGPT, Perplexity, and Gemini responses. Google's AI Overview named the brand first for a key regional query about the best local solar provider, and cited a company blog for a core heat-pump service topic.

Across Google Search Console, we reached 6,760 clicks and 276,000 impressions at a 2.5% CTR over three months, with Germany-specific CTR at 4.7%, above benchmark for the ranking range.

I helped my website developer to create a full SEO and CRO audit covering top pages, device performance, blog performance, and heatmap analysis, which shaped the content and UX roadmap. I validated the blog strategy with a comparison article that improved clicks by 430%.

REPUTATION MANAGEMENT

(As Community Manager)

I managed the company's reputation across Trustpilot and Google Business Profile thoroughly, covering the Erkelenz headquarters, Karlsruhe and Bad Neunahr branches. **I helped improving the Google Business Profile to 7,870 profile views (up 682% versus July 2025) and 1,538 search appearances (up 372%), which correlates to the SEO and AI SEO improvement, strengthening the company's visibility across its core service regions. I maintained a 4.9 2000+ ongoing reviews on Google Review and 4.9 Trustpilot score with a standardized brand tone, 100% review response coverage and turnaround as quickly as possible, daily.**

I wrote brand-consistent, personalized replies in German that reinforced trust at the customer decision stage. Our own website analysis confirmed the value of this work: heatmaps showed review sections were the hottest elements on the site, and review-related queries appeared repeatedly in search, so the reputation layer I managed fed directly into conversion.

Google Business Profile — July 2026 vs July 2025

+682%

Profile views — 7,870 total

+372%

Search appearances — 1,538 total

4.9★

Score maintained in Google Reviews & Trustpilot

100%

Quick review response coverage

Why it matters?

- Reputation is the conversion layer. Solar and heat pumps are five-figure decisions; prospects check reviews before inquiring, so a 4.9 score is what turns interest into leads.
- In a high-consideration purchase, prospects check local presence and reviews before buying, this will strengthen both directly supported lead intent in Planville's core service regions.
- 100% coverage protects brand equity. Answering every review prevents silent rating erosion and keeps the public narrative controlled.
- Local visibility and reviews compound. The 682% profile-view and 372% search-appearance growth put the brand in front of more local prospects, where the strong score converts that visibility into clicks and calls.
- Multi-location scope. Managing both the HQ and Karlsruhe branch shows consistent brand voice across a distributed presence.
- Funnel position. This sits at the decision stage, where trust converts the demand that content and paid reach create.
