PROJECT APPROACH

Having reviewed the brief for this supplementary beauty content campaign, we recognize the importance of creating a versatile suite of high-quality product photography assets that go beyond the traditional. This campaign is not just about showing the product—it's about capturing the essence of Olay's skincare philosophy: confidence, clarity, and care.

We understand that these visuals will support a wide range of marketing and advertising channels, from digital platforms and e-commerce to social media, paid media, and OOH. As such, consistency in tone, lighting, mood, and message will be critical.

Our approach is rooted in precision, creativity, and strategic execution. We begin by aligning closely with your brand guidelines, visual identity, and campaign objectives. From there, we'll craft a clear visual direction tailored to your audience—highlighting texture, ingredients, usage moments, and product benefits with crisp detail and premium styling.

We will ensure each shot not only serves a functional purpose but also evokes emotion and elevates brand perception.

TECHNICAL SETUPS

THE GOAL

These visuals will serve as essential touchpoints in communicating Olay's core brand values—science-backed skincare, beauty with purpose, and everyday empowerment—through clean, sophisticated, and emotionally resonant imagery. Our aim is to not only highlight the functional benefits and aesthetic appeal of each product but also to translate Olay's broader messaging to key target demographic (25+ y.o women) into visual form: confidence, innovation, and care.

Ultimately, the goal is to craft a visual library that empowers Olay to communicate its story more effectively, convert more meaningfully, and stand out in a highly competitive, visually driven beauty market.

VISUAL PRINCIPLE

*as references only

All visuals will look clean, dynamic, light, vibrant and elegant.

They will convey a feeling that they refine you, accompany you in stages of life (25+ y.o. women) and make you confident with healthy skin.

Aligned with Olay's visual language, this project will be shot with a high-resolution camera, a high-key lighting setup and clear white background to create beautiful lighting and contrast.
